SOUTH AUSTRALIA.

STATISTICAL REGISTER.

1936-37.

Compiled from Official Records.

By A. W. BOWDEN, A.I.A.,
Government Statist, &c.

ADELAIDE:
By Authority: Frank Trigg, Government Printer, North Terrace.
1938.

Statistical Register of South Australia, 1936-37.

PREFACE.

The Statistical Register is divided into five parts as follow:—

Part I.—Social—Administration, Justice, Education, Hospitals, Charities, etc.
II.—Population and Vital
III.—Finance—State, Local Government, Banking, etc.
IV.—Trade, Transport and Communication
V.—Production

while a Statistical Summary of South Australia for the years 1836 to 1936-37 inclusive is attached at the end of the volume.

Since in most cases considerations of space do not permit of a verbal analysis of the figures, it has been necessary in certain tables to append explanatory notes at the bottom of the page. Careful attention is drawn to these notes since they will generally be of considerable assistance in interpreting the published figures.

My thanks are tendered to the various heads of State and Commonwealth Departments for their co-operation in furnishing statistical data, often at considerable inconvenience.

I desire also to express my appreciation of the services of Mr. H. L. Semmens, Assistant Government Statist, and of the staff of compilers and other officers for their careful attention to intricate details in the compilation of the various sections of this volume.

1st September, 1938.

A. W. BOWDEN, Government Statist, &c.

Statistical Register of South Australia, 1936-37.

Part II.—POPULATION AND VITAL.

Report of the Government Statist and Principal Registrar of Births, Deaths, and Marriages on Population and Vital Statistics for the year 1936.

POPULATION, YEAR 1936.

State.—On 31st December, 1936, the population of the State was estimated to be 589,312 (586,443), an increase of 2,869 (2,149) for the year. Males numbered 294,807 and females 294,505.

Metropolitan Area.—The population of the metropolis on 31st December, 1936, was estimated to be 316,858 (315,130), an increase of 1,728, and representing 53·77 (53·74) per cent. of the population.

An area approximately within a 10-mile radius of the G.P.O., Adelaide, is called the metropolis and embraces the cities of Adelaide (31,390 at 31st December, 1936), Unley (41,448), Port Adelaide (29,939), and Prospect (20,479), and the corporate towns of Brighton (5,086), Burnside (24,287), Colonel Light Gardens (4,970), Glenelg (10,836), Henley and Grange (4,543), Hindmarsh (13,097), Kensington and Norwood (14,460), St. Peters (11,657), Thebarton (14,700), and Woodville (27,722), and the district councils of Campbelltown (4,200), Enfield (5,831), Marion (6,120), Mitcham (17,198), Payneham (7,921), Walkerville (4,621), and West Torrens (16,403).

Country Corporations.—The population of the principal corporate country towns at 31st December, 1936, was :—Port Pirie, 11,768, Mount Gambier, 5,677 ; Gawler, 4,148 ; Murray Bridge, 3,659 ; Port Augusta, 3,296 ; Peterborough, 3,326 ; Port Lincoln, 3,025 ; Wallaroo, 2,741 ; and Kadina, 2,096.

Sources of Increase.—The natural increase (excess of births over deaths) for the year was 3,447 (3,107) or 0·59 (0·53) per cent. There was a loss of 578 (958) or 0·10 (0·16) per cent. by migration, a gain of 242 with oversea countries and a loss of 820 with other States, thus reducing the gain of 3,447 by natural increase to a net gain only of 2,869 for the year, equal to 0·49 (0·37) per cent.

Migration.—For the year 1936 34,369 (30,475) persons arrived in the State, and 34,947 (31,433) departed, loss 578. The principal countries were :—Commonwealth States—Arrived 32,745 (28,952), departed 33,565 (29,779) ; United Kingdom—Arrived 867, departed 846 ; France—Arrived 148, departed 67 ; Italy—Arrived 125, departed 49 ; Egypt—Arrived 60, departed 31 ; South African Union—Arrived, 90, departed 116 ; India and Ceylon—Arrived 249, departed, 204.

Assisted Immigrants.—Nil (nil). Arrivals, 1921-1930, numbered 13,114.

Aboriginal Population.—On the 30th June, 1936, there were estimated to be 1,543 full blood and 1,814 half-castes, total of 3,357 aboriginals in the State. These were duly reported by the Police Officers. In addition, an unknown number are in the north-west of the State. Out of the 3,357 aboriginals, 618 were reported as employed (491 males, 127 females) ; 873 are on mission stations, including 186 employed.

Naturalisation.—During the year 105 (148) aliens were naturalised in the State. Germans 15 (15), Italians 35 (88), and Greeks 32 (16).

Parks and Reserves.—The City of Adelaide has 1,927 acres of public parks and reserves. The Metropolis 5,500 acres, and the country corporations 4,000 acres.

Building Operations.—(*a*) Number—In the metropolitan are permits for the erection of 917 (685. dwelling-houses were issued, an increase of 232, and 807 more than the record low number of 110 in 1932, Prior to that, there had been a continuous decrease from the maximum number of 3,543 in 1926. (*b*) Values—The estimated total value of all new buildings, including alterations, was £1,576,841 (£1,394,344), increase £182,497. The values had previously fallen from £4,408,433 in 1926 to £388,491 in 1932.

The following are the particulars for the whole of the State :—Permits issued totalled 1,317 (1,021) for dwelling-houses, total value of all new buildings, including alterations, being £1,976,841 (£1,687,096).

CENSUS, 30TH JUNE, 1933.

During the intercensal period, the population is estimated annually from records of births and deaths and migration returns. On the results of the 1933 census being known, the estimates were adjusted accordingly for each year since the previous census (1921) which will account for any differences in the figures now appearing and those published during the intercensal period.

The population of the State as a result of the census on 30th June, 1933, was 580,949, an increase in 12¼ years of 85,789 (17·33 per cent.).

For the metropolitan area the population was 312,758 (53·83 per cent. of the total).

Dwelling Houses.—The census of 1933 recorded 139,991 (107,914 in 1921) occupied dwelling houses inclusive of tenements, in the State, with inmates averaging 4·15 (4·56) per dwelling. The inmates averaged 4·82 in 1911, 5·16 in 1901, and 5·28 in 1891. There were 5,353 (4,431) unoccupied dwelling houses and 160 (674) being built.

Detail Information.—See returns 10-33. Following this report are extracts from notes supplied by the Commonwealth Statistician (pages 14-16).

VITAL STATISTICS, YEAR 1936.

BIRTHS.

Numbers for State.—In 1936 the births registered numbered 8,911 (8,270), an increase of 641. The number had fallen steadily from 11,492 in 1927 to 8,521 in 1932, and after a rise in 1933 it fell to 8,270 in 1935, despite the increase in marriages. The 1936 number, however, is the highest since 1931.

Numbers Metropolitan Area and Country.—The births for the city and suburbs for 1936 numbered 4,296, and for country districts 4,615, the respective rates per 1,000 mean population being 13·60 and 17·07. NOTE.—Births are classified according to the usual residence of the mother.

Multiple Births.—Twin births numbered 79 (70) sets. Males 68 (75) and females 90 (65). There were two triplet births in 1934, being the first since 1929, but none since. In 1919 there was one quadruplet birth of four males, and for the ten years 1926 to 1935, seven triplet births and 984 twin births. In 1882, there was one quintuplet birth (one male, four females) of whom four died in five minutes and one in two days.

Sexes.—Males numbered 4,509 (4,286) and females 4,402 (3,984). The males always exceed the number of females born, the average number of males born to every 100 females for 1936 being 102·43 (107·58).

Ex-Nuptial Births.—272 (280) were registered during the year. The percentage on total births registered was 3·05 (3·38). The percentage of ex-nuptial births in this State for many years has been much lower than that of any of the States or New Zealand.

Legitimations.—34 (21) were legitimated under the Act during the year.

Still-Births.—In this State the law does not at present provide for the registration of still-births. Certificates of the stillborn are issued by the Departmental Registration Officers for Maternity Allowance, and from this source the following numbers have been ascertained. They give an indication of the probable number for the State :—1927, 285 ; 1928, 290 ; 1929, 334 ; 1930, 232 ; 1931, 184 ; 1932, 217 ; 1933, 194 ; 1934, 168 ; 1935, 142 ; and 1936, 188. From 1931 the figures are incomplete, the allowance being only paid where income did not exceed certain various amounts. Registration is compulsory from May, 1937.

Adoptions.—The Adoption of Children Act was brought into operation in October, 1926. The following are the numbers adopted in recent years :—1927, 206 ; 1928, 130 ; 1929, 119 ; 1930, 102 ; 1931, 89 ; 1932, 97 ; 1933, 98 ; 1934, 78 ; 1935, 126 ; 1936, 99.

Natural Increase.—The annual natural increase—excess of births over deaths—for the five years 1930-1934 was ·69 percentage of the population. For the five years immediately preceding (1925-1929) it was 1·12 per cent., and for the pre-war period (1910-1914) it was 1·77 per cent. For the year 1936 it was 0·59 (0·53) per cent.

Crude Birth Rates.—The birth rate per 1,000 of mean population for 1936 was 15·17 (14·14). Except for rises in 1933 and 1936, each succeeding year of the past 16 years has been the lowest in the record of the State. Fortunately the death rate has also fallen and slightly lessened the effect of the rather substantial fall in the crude birth rates. For the five years' period 1910-1914 (just prior to the war) the annual birth rate averaged 27·98 per 1,000 of mean population ; for 1915-19, 25·51 ; 1920-24, 23·43 ; 1925-29, 20·16 ; and 1930-34, 15·54. The average rate for the five years' period 1930-34 represented a fall of 12·44 over the period 1910-1914.

Birth Rates in Australasia.—The following statement shows the birth rate per 1,000 of the population in each of the Australian States and in New Zealand for the last five years :—

Year.	New South Wales.	Victoria.	Queensland.	South Australia.	Western Australia.	Tasmania.	Australia.	New Zealand.
1932	17·40	15·18	18·56	14·74	18·30	19·78	16·86	17·12
1933	16·98	15·59	18·13	15·32	17·95	19·93	16·78	16·63
1934	16·52	15·20	18·16	14·50	17·68	19·51	16·39	16·51
1935	16·89	15·16	18·31	14·14	18·23	19·41	16·55	16·17
1936	17·31	15·63	19·17	15·17	18·86	19·84	17·13	16·64

The birth rate in England and Wales was 14·7 (14·8) in 1935.

Since the crude birth rate is calculated with reference to the total mean population, it is obvious that it will be affected by any marked change in the age and sex distribution of the population over a period of years. Therefore, although such a rate gives a fairly reliable measure over a small period of time, it would not reveal the true position when comparison is made over a long period.

A more accurate comparison may be made by means of a birth rate per 1,000 women at the principal child-bearing ages. This rate refers all births (nuptial and ex-nuptial) to all women at the given ages (married and single). It would be still more accurate to have two rates (*a*) nuptial rate, (*b*) ex-nuptial rate, but space does not permit of a more detailed analysis. The table cannot be continued from 1935 until particulars of ages at the next census become available.

BIRTH RATES PER 1,000 OF FEMALES, AGE 15-49.

Year.	Estimated Mean Female Population, Age 15-49.	No. of Births.	Birth Rate per 1,000 Females, 15-49.	Crude Birth Rate per 1,000 Total Population.
1915	117,409	11,798	100·49	26·43
1920	127,514	12,028	94·33	24·72
1925	137,801	11,457	83·14	21·22
1930	148,794	9,984	67·10	17·42
1931	151,100	9,079	60·09	15·77
1932	153,434	8,521	55·54	14·74
1933	155,781	8,900	57·13	15·32
1934	156,464	8,459	54·06	14·50
1935	156,940	8,270	52·70	14·14

MARRIAGES.

Number of Marriages.—5,182 (4,845) marriages were registered for the year 1936, an increase of 337, on the record of the previous year, or an increase of 2,115 during the last five years. The rate per 1,000 mean population was 8·82 (8·28), the highest rate since 1921.

Officiating Ministers.—At the close of the year there were 730 Ministers of Religion and 24 Registrars enrolled with power to celebrate marriages. The Act provides that when a marriage is celebrated by a minister, he must send within seven days, one certificate to the District Registrar and one certificate with licence, &c., to the Principal Registrar, and at the end of each quarter a statement of all the marriages celebrated by him during such period.

Of the total marriages for the year, Methodist Ministers celebrated 1,639, or 31·6 per cent. ; Church of England, 1,244 or 24·0 per cent. ; Roman Catholic, 624 or 12·0 per cent. ; the Registrars celebrated 431, or 8·3 per cent.

The following table gives further particulars :—

Marriages in each Denomination and Ministers Enrolled.

Conjugal Conditions of those Marrying.—Bachelors, 4,810 (4,533), spinsters 4,918 (4,614), widowers 274 (228), widows 171 (132), divorced men 98 (84), divorced women 93 (99).

Of the 4,810 (4,533) bachelors, 4,667 (4,400) married spinsters, 77 (67) married widows, and 66 (66) married divorced women.

Of the 274 (228) widowers, 176 (146) married spinsters, 85 (60) married widows, and 13 (22) married divorced women.

Of the 98 (84) divorced men, 75 (68) married spinsters, 9 (5) widows, and 14 (11) divorced women.

Ages of those Marrying.—The numbers marrying at each of the following age groups were :—Under 21 years of age, 223 males, 844 females ; 21 years and under 45 years, 4,666 males, 4,180 females ; 45 years and upwards, 293 males and 198 females. Total 5,182 males, 5,182 females.

The mean age of those marrying for the year was for males ; 29·36 (29·23), and females 26·12 (25·90). These means have only varied by decimal points for years.

Numbers Over 70 Years of Age.—During the year 26 (30) persons married being over the age of 70 years, 21 were males and 5 females.

Marriages of Minors.—The written consent of the parents is necessary in the case of a marriage of a person under 21 years of age. During the year 1,067 (1,028) minors were married representing 10·3 (10·6) per cent. of the total persons marrying. The numbers at each age were as follows :—

	13.	14.	15.	16.	17.	18.	19.	20.	Total.
Males ...	-- (—)	— (—)	— (—)	1 (1)	5 (6)	30 (23)	59 (52)	128 (117)	223 (199)

Divorces.—213 (211) decrees of divorce were made absolute during the year. The increase has been considerable since the war. For the five years 1910-1914, the annual average was 12·2 ; 1915-9, 19·0 ; 1920-4, 73·2 ; 1925-9, 94·8 ; and for the five years, 1930-34, 155·4.

Marriage Rates per 1,000 *of Mean Population.*—The annual rates per 1,000 of mean population for quinquennial periods from 1905-1934 and the years 1934 to 1936 were as follows :—

Period.	Rates.	Period.	Rates.	Period.	Rates.
1905-1910	7·93	1920-1924	8·55	1934.....	7·39
1910-1914	9·38	1925-1929	7·54	1935.....	8·28
1915-1919	7·94	1930-1934	6·33	1936.....	8·82

The marriage rate for 1936, 8·82, is the highest rate since 1921 but the annual mean for the five years ended 1934, 6·33, was lower than the annual mean of any quinquennial period since 1895-9. The pre-war period 1910-1914 had the high annual average of 9·38.

Marriage Rates in Australasia.—The following statement shows the marriage rate per 1,000 of the population in each of the Australian States and in New Zealand, for the last five years :—

DEATHS.

Numbers for State.—The deaths registered during the year numbered 5,464 (5,163), an increase of 301, and the highest number on record.

Males numbered 2,961 (2,831), and females 2,503 (2,332).

Metropolis and Country.—3,427 deaths were classed to the metropolitan area and 2,037 to the remainder of the State. The rates per 1,000 population were—Metropolis, 11·27 ; remainder of State, 7·53.

NOTE.—Deaths are classified according to the usual residence of the deceased person.

Crude Death Rate per 1,000 *of Mean Population.*—The death rate of total registrations for 1936 was 9·30 (8·83). Although the rates for 1934 to 1936 were higher than the four preceding years it is gratifying to record that there has been a substantial decrease in the rate compared with 1919 and earlier years, when the average was from 10 to 11.

The annual mean rate per 1,000 of population for the quinquennial period, 1900-1904, was 10·99. For the period 1920-1924 it fell to 9·68, 1925-1929 to 8·98, and 1930-1934 to 8·65, a decrease of 2·34 from 1900-1904. This fall helped to counter the effect of the regrettable fall in the birth rate upon the net natural increase in population. The net natural increase fell from an annual mean of 14·06 per 1,000 of population for the years 1900-1904 to 6·89 for the years 1930-1934, a decrease of 7·17.

Death Rate of Sexes.—The annual mean crude death rates for the period 1900-1904 was 12·04 per 1,000 of population for males and 9·94 for females, and for the period 1930-1934, 9·21 for males and 8·08 for females. The death rate of males is thus seen to be much higher than for females and to have fallen since the period 1900-1904 by 2·83 and females by 1·86 per 1,000 of population, equal to 23·51 per cent. for males and 18·72 per cent. for females.

The following are the particulars for the period 1900 to 1936 :—

The death rate in England and Wales was 11·7 (11·8) in 1935.

Index of Mortality.—Over a long period of years, the crude death rate is open to objection when used as a measure of the vitality or mortality of the population. Mortality can properly be examined only with reference to the age and sex distribution of the population. Analysed mortality tables are now in course of preparation for the Commonwealth Statistician and, when these are available, it will be possible to give a true measure of the great increase in the longevity of the population over the past two decades.

The expedient is often used of substituting for the crude death rate a " standardised death rate " or " index of mortality." Such a rate is shown in the following table, in which the differences in the age and and sex constitutions of the populations of the six States have been taken into account in computing their respective indexes of mortality. The results for each are based upon a standard population, distributed according to sex, into eleven age-groups. This table may be taken as a fairly reliable measure of the relative total mortality of different States during the period 1921 to 1935. It will be noticed that South Australia has the lowest index for the Commonwealth.

Deaths of Centenarians.—The deaths of 2 males (1–101, 1–107) and 6 females (2–100, 2–101, 1–102, 1–104) were registered for the year. The previous year there were 1 male and 3 females (all at 100).

Deaths in Age-Groups.—277 (289), or 5·07 (5·60) per cent. of the total deaths occurred within the first year of life, and 391 (392), or 7·16 (7·59) per cent. within five years of life, 600 (558), or 10·98 (10·81) per cent. of the total were under 20 years of age, and 2,316 (2,082), or 42·38 (40·13) per cent. were 70 years and over. The following are the particulars of the deaths in age-groups :—

Causes of Death.—The Statistical Classification of the Causes of Death adopted is in accordance with the International List of Causes of Death as revised in 1929. Previous to 1931, the 1920 revision had been used.

The number of deaths, male and female, from each of the causes set forth in such list, and the age-groups decided upon by the Conference of Statisticians and Health Authorities in 1928, have been classified and may be found in Tables Nos. 49 and 51 of this Section of the Statistical Register. The principal causes only can be referred to in this report, and are set forth in the following table. The percentage of each to the total deaths and the rates of each per 10,000 of mean population are also shown.

Diseases of the Heart.—From the foregoing it is noted that diseases of the heart, account for the greatest number of deaths, though the rate per 10,000 of mean population from 1910 to 1930 varied but little except during the war period when it increased. In quinquennial periods the average annual rates per 10,000 of population were :—1910-1914, 11·11 ; rising in the war period 1915-1919 to 12·16 ; 1920-1924, 10·69, 1925-1929, 10·53 ; 1930-1934, 13·94. Some of the substantial increase since 1930, and decreases under senility and ill-defined diseases, are the result of the movement initiated for more definite medical certificates, the better classification having proved the 1930 and previous figures to have been understated.

For the year 1936 the deaths totalled 1,101 (1,029), increase 72, the number being equal to 20·15 (19·93) per cent. of the total deaths and 18·74 (17·59) per 10,000 of the mean population.

Cancer and Tuberculosis.—Except for rises in 1931 and 1933, the death rate for tuberculosis has been showing a heavy continuous fall, the rate for 1936 being less than half the rate 20 years ago. Cancer had been showing a fairly continuous rise, but during the last few years the rate has been fluctuating, that for 1936 showing an increase over the low rate of 1935. The increase in latter years is not so serious as it would appear from the crude death rate, for most cancer deaths are of older persons, and these now constitute a much greater proportion of the population. See also remarks below *re* cancer.

The following are the comparative particulars for the years 1910 to 1936 :—

1936 (")	235	4·00	3·47	740	12·60

From the foregoing table it is noted that the deaths per 10,000 of population from tuberculosis averaged annually 8·65 for the period 1910-1914, and those for cancer 7·94, or ·71 less than tuberculosis, whilst the annual averages for the last five years, 1930-1934, were—Tuberculosis, 5·14 and cancer 11·29, the rate for cancer being 6·15 above tuberculosis for the latter period, whilst for the year 1936 the average per 10,000 of population from tuberculosis was only 4·00 (4·44) and from cancer 12·60 (10·43).

Tuberculosis of the Respiratory System.—Out of the total deaths from tuberculosis of all kinds 235 (260) for the year 1936, tuberculosis of the respiratory system caused 204 (229) deaths, or 87 (85) per cent. The rates for the two years were 1935, 3·91 ; 1936, 3·47 ; a considerable fall on previous years. For the period 1910-1914 it was 7·18, or greater by 2·68 per 10,000 of population than in the period 1930-1934.

Cancer—Seat of Disease.—Cancer of the stomach and duodenum 159, 106 males and 53 females, breast 90, male genital organs 61, rectum 56, buccal cavity and pharynx, 43, and uterus 38, are the chief seats of the disease. Total cases 740 (610). Further details are shown in Return No. 46.

Notes re *Increased Deaths.*—Although the deaths from cancer as shown in crude numbers and rates have increased rapidly during the last 20 years, the position is not so serious as it at first appears. The age constitution of the people has a marked effect, due to the fact that most cancer deaths are of older persons. The lower birth rate and the increased longevity of the people have had such an effect that whereas the number of persons under 40 years of age had only increased by 27 per cent. between the 1911 Census and the 1933 Census, those 40 years of age and over had increased by 88 per cent. and those 60 years and over by 112 per cent. The crude cancer death rate between 1911 and 1933 had increased 59 per cent., but for persons under 40 years of age it had decreased 21 per cent. ; for persons 40 years of age and over it had only increased 25·5 per cent. and for those 60 years and over only 21·5 per cent.

Further it is almost certain that more accurate diagnosis by the medical profession has resulted in an increased number of deaths being classed to cancer. The rate of deaths of persons 60 years of age and over from senility has decreased by 73 per cent. and from ill-defined causes by 81 per cent. from 1911 to 1933, and probably a number of deaths that would have been merely classed as senility or which were ill-defined previously are now classed to some definite disease, such as cancer.

Tuberculosis, Cancer, Heart Diseases and Nephritis.

It has previously been pointed out that the crude death rate is not an accurate measure of mortality, which can be properly examined only with reference to its incidence at individual ages. This is even more important when comparing the effect of different diseases, which fact may be illustrated by the table hereunder showing the average mortality over the three years 1932-1934 per 10,000 of population at decennial age groups. No attempt has here been made at statistical refinement, but the table may be taken as giving an approximate measure of the relative incidence of mortality from the causes specified at various ages.

The table may serve to illustrate the heavy mortality from Tuberculosis at ages under 50, the heavy rate for females at ages 20-29 being outstanding.

Since mortality decreases rapidly during the first five years of life, the death rate from tuberculosis has been prepared for age-groups 0-4 and 5-9 as follows :—

Age-Group.	Males.		Females.	
	Tuberculosis.	All Causes.	Tuberculosis.	All Causes.
0-4	2·44	98·52	1·81	82·53
5-9	0·49	11·83	0·76	10·39

Too much reliance cannot, however, be placed in the death rate at group 0-4, since here the group rate is an average of a rapidly changing mortality. The same criticism applies throughout, but the effect is significant only at the extreme ages.

Pneumonia (*including Broncho-pneumonia*).—Total deaths 343 (390), rate 5·84 (6·67). The annual rate for the period 1910-14 was 5·15, and for the period 1930-34, was 5·95, an increase in the latter period over the earlier of 0·80 per 10,000 of population. Broncho-pneumonia deaths were 168 (211), and Lobar, 158 (169).

Bronchitis, Acute, Chronic, and Unspecified.—Total deaths 74 (59), rate 1·26 (1·01). Bronchitis averaged annually the five years 1930-1934, 1·25 per 10,000 population, and 2·93 for the years 1910-1914, a decrease of 1·68 per 10,000 of population.

Other Respiratory Diseases.—Excluding the deaths from pneumonia 342 (390) ; and bronchitis 74 (59), the total deaths from other respiratory diseases numbered 124 (113), the principal causes being—pleurisy, 19 (27) ; congestion and haemorrhage of lungs, 75 (57) ; asthma, 3 (11).

Parasitic and Infectious Diseases.—These classes of disease were responsible for 339 (395) deaths, which includes the 235 (260) deaths from tuberculosis already reviewed. The remaining chief causes were :—Typhoid fever 4 (5) ; whooping cough, 9 (23) ; diphtheria, 30 (20) ; influenza, 17 (26) ; dysentery, 8 (3) ; syphilis, 14 (12) ; tetanus, 11 (14).

Notifiable Infectious Diseases.—Certain proclaimed infectious diseases are notifiable under the Health Act to the Central Board of Health. A total of 4,830 (7,571) cases were reported during the year.

The principal diseases were diphtheria, 1,279 (526) ; typhoid fever, 51 (29) ; erysipelas, 121 (95) ; measles, 88 (454) ; puerperal fever, 89 (46) ; pulmonary tuberculosis (phthisis), 266 (318) ; scarlatina and scarlet fever, 397 (461) ; whooping cough, 751 (3,616) ; chicken pox, 1,423 (1,192) ; influenza, 135 (705) ; mumps, 198 (84).

Cerebral Haemorrhage, Embolism and Softening (including combined with Arterio-sclerosis).—Total, 527 (488). The annual rate per 10,000 of population for the five years, 1930-34, was 7·47. For the period 1910-1914 it was 4·75, 1915-1919, 5·60, and 1920-1924, 6·32. Thus it is seen the increase has been continuous. For 1936 it was 8·97 (8·34).

Diabetes Mellitus.—110 (88). Males 33 (32), females 77 (56). Of the total 94 (81) were 50 years of age and over.

Puerperal Diseases, Accidents of Pregnancy and Confinement.—Total 53 (49). Of this number 7 (8) were recorded as due to puerperal septicaemia, and 20 (9) to abortion with septic conditions, including 5 (4) criminal abortion. The rate is equal to 5·95 (5·93) per 1,000 live births. Excluding criminal abortion the rate was 5·39 (5·45).

External Causes.—Total 339 (301). The principal causes were—Suicides, 69 (59), equal to a rate of 1·2 (1·0) per 10,000 of population ; accidental drowning 35 (32) ; automobile accidents, 76 (69) ; traumatism by falls, 50 (47) ; homicides, 6 (4) ; excessive heat, 3 (2).

Infantile Mortality.

There were 277 (289) deaths of infants under one year of age, a decrease of 12. The average per 1,000 live births was 31·09 (34·95), which is believed to be a world record, the next lowest being 31·15 for New Zealand in 1936. For many years South Australia, in common with the other States of the Commonwealth and New Zealand, has had a very low mortality rate for infants under one year of age compared with other countries. But even so the economic loss to the State is considerable, for in the last 10 years, 3,870 infants died before reaching the age of one year and, in addition, 1,298 before reaching five years of age, making a total loss of 5,168 under five years of age. In other works, the State has lost by death during the last 10 years approximately one baby in every 25 born before reaching the age of one year with an additional loss before the age of five is reached. Further, there is the loss of unrecorded still-born children, approximately 300 annually. (See paragraph *re* still-births, page 4).

Infantile Mortality in Australasia.—The following statement shows the infantile death rate per 1,000 births in each of the Australian States and in New Zealand, for the last five years.

The infantile death rate in England and Wales was 57·0 (59·0) in 1935. The infantile deaths per 1,000 births in the Australasian capitals in 1935 were as follows :—Melbourne, 43·01 ; Sydney, 35·61 ; Brisbane, 42·41 ; Adelaide, 35·11 ; Perth, 40·05 ; Hobart, 73·47 ; and Wellington, 34·66.

1930-1934	342	38·05	1936	277	31·09

The annual mean death rate of infants under one year of age for the five years 1895-1899 was 110·25 and for the five years, 1930-1934, only 38·05. Fall of 72·20 per 1,000 live births is certainly very gratifying, with a further fall in later years. The 1936 rate was only about half the rate 20 years ago, and one-third of the rate around 1900.

Still there are points revealed by an analysis of the facts which are not satisfactory. I refer to the record of deaths under one month of age. Most of the improvement has taken place in the rates for ages above one month and under 12 months. In the tabulated summary and in the graphs the rates for deaths of infants under one month, under one week, and under one day of age are shown separately, and these show less progress.

Under one month for the period 1900-1904 the mean rate was 32·85, and 1930-34, 23·59, a fall of only 9·26, whilst for the ages one month and under 12 the rates for the same period were 59·10 and 14·46, a fall of 44·64. Further, during the last period, of the total number (1,060) dying within one month of life 839 or 79 per cent., died before reaching the age of one week, and 452 or 43 per cent. of the 1,060 were less than one day old. The great majority of those dying under one month of age died from pre-natal causes.

The annual mean number and annual mean rates per 1,000 births of infants dying within the following ages were as follows :—

Explanation of Graph.—The bases of the small rectangles represent the years, and the annual means for the quinquennial periods are also shown. The figures to right and left represent the rate per 1,000 live births.

Pre-natal Causes of Death.—Code Nos. 157—161. During the five years, 1930-34, deaths from malformations, congenital debility, premature births, and other diseases of early infancy which may be termed "Pre-natal Causes" accounted for 1,095 deaths, or 64 per cent. of the total dying within one year of age compared with 43 per cent. for the period 1910-14. Nearly all of these deaths occurred within one month of birth. Deaths from diarrhoeal diseases for 1930-34 were 127, or 7 per cent. compared with 26 per cent. for 1910-14, and other diseases 490, or 29 per cent. compared with 31 per cent.

The average percentage of loss from pre-natal causes is greater for the period 1930-34 than for the previous three quinquenniums. These facts indicate the direction in which efforts for the saving of infant life should be directed.

Sexes.—The number of boys dying before reaching one year of age for the last five years numbered 812, and girls 653, the deaths of boys being 24 per cent. greater. For 1936—Of the total deaths 277 (289) —152 (158) were males and 125 (131) were females.

Care of Infant Life.—The Mothers' and Babies' Health Association, formerly called "School for Mothers Institute and Babies' Health Centre," has 58 branches in the State ; 40 of which are in the metropolitan area. In addition, the Railway Travelling Clinic calls at 26 country towns every two months, and on Eyre Peninsula a Nurse calls at 15 towns every six weeks. The Government makes an annual grant of £3,000 to the Association. During the year ended 31st July, 1936, the nurses paid 2,702 visits to expectant mothers and 25,918 to young babies. Baby clinics are also established in the State, and during 1935-36, 95,075 examinations of babies brought by mothers were made and advice given when necessary.

ANATOMY ACT, 1884.

The Inspector of the School of Anatomy reported, under Clause 6, that 14 (17) bodies had been removed to the University School of Anatomy for anatomical examination.

STATISTICS FOR PRINCIPAL LOCAL GOVERNMENT AREAS.

The particulars for local areas are classified as follows :—

Births and Deaths.—To the local area of usual residence of mother of child and the usual residence of the deceased person.

Marriages.—To the local area in which celebrated.

A. W. BOWDEN,

Government Statist and Principal Registrar of Births, Deaths, and Marriages.

Statistical Office, Adelaide, 1st June, 1937.

No. 3.

CENSUS, 30TH JUNE, 1933.

EXTRACTS FROM NOTES BY COMMONWEALTH STATISTICIAN (FOR DETAILS SEE RETURNS 10 TO 33).

Population.—The revised figures for the population of South Australia as at the Census of the 30th June, 1933, are :—Males, 290,962 ; females, 289,987 ; total, 580,949.

Age.—A satisfactory feature of the results is the very small number of cases of failure to specify the age of the person enumerated, the total number of such cases being only 974, or 0·17 per cent. of the total population of the State, as compared with 1,220 persons, or 0·25 per cent. at the 1921 Census. Of the population for whom age was stated 7·8 per cent. were under five years of age ; 9·2 per cent. from five to nine years ; 9·4 per cent. from 10 to 14 years ; 9·5 per cent. from 15 to 19 years ; and 37·7 per cent. were under 21 years. It will be seen that a smaller percentage of the population is in each younger age group descending from 15 to 19 years down to 0-4 years. Since the 1921 Census there has been a sharp decline from 10·9 per cent. to 7·8 per cent. in the proportion of the population under five years of age, and from 41·7 per cent. to 37·7 per cent. in the percentage under age 21. At the Census of the 30th June, 1933, there were actually 8,762 less children under five years of age, and 10,235 less children under 10 years of age than were in South Australia at the previous Census in the year 1921. An analysis of the numbers under the age of five years shows that the number of children under one year of age has decreased by 3,315 or 28·3 per cent. below that enumerated at the previous Census ; those between one and two years have decreased by 2,288, or 21·9 per cent. ; two and under three years by 1,235 or 12·0 per cent. ; three and under four years by 1,123, or 10·6 per cent. ; and between four and five years decreased by 801 or 7·4 per cent.

These figures reflect the extent of the decline in birthrate. Had the average effective birthrate which prevailed between the Census of 1911 and 1921 continued until 30th June, 1933, the number of children under 10 years of age in South Australia would have been 40,000 more than were actually enumerated at the Census. On the other hand, the number of persons aged 65 years and over in South Australia at the 1933 Census was 15,641 more than at the previous Census, as compared with an increase of 6,176 during the previous intercensal period 1911 to 1921.

Conjugal Condition.—At the 1933 Census, 54·3 per cent. of the population of South Australia were never married ; 40·4 per cent. were married ; 5·1 per cent. widowed ; and 0·2 per cent divorced. The proportion of males who had never been married was 56·4 per cent. and females 52·2 per cent. For every 100 females never married, there were 108 males never married at the 1933 Census, as compared with 107 males at the previous Census. During the intercensal period the number never married increased by 11 per cent. ; those married by 24 per cent. ; widowed by 36 per cent. ; and divorced by 242 per cent. At the 1933 Census there were 7·6 widowed males and 18·0 widowed females for every 100 who were married, as compared with 7·1 and 16·1 respectively at the previous Census.

Dependent Children under 16 *years of age.*—70,256 males and 5,684 females stated that they had children under 16 years of age dependent on them at the 30th June, 1933. The number of dependent children under age 16 claimed totalled 162,852, being equivalent to an average of 2·2 dependent children under 16 years for each male with dependent children, and 1·7 for each female guardian. For each adult male in South Australia the average was 0·85 dependent children, and for each male breadwinner (excluding pensioners) 0·75 dependent children.

Thirty-nine per cent. of the males with dependent children under 16 years had one child ; 30 per cent. two children ; 16 per cent. three children ; 8 per cent. four children ; 4 per cent. five children ; and 3 per cent. more than five children. Fifty-nine per cent. of the female guardians had one dependent child under age 16 ; 24 per cent. two children ; 9 per cent. three children ; 5 per cent. four children ; and 3 per cent. more than four children.

Nine thousand seven hundred and one children or 6·0 per cent. of the total dependent children under 16 years of age in South Australia were dependent on females.

Orphanhood.—The number of children under 16 years of age in South Australia at the 30th June, 1933, totalled 163,878, of whom 51 per cent. were males and 49 females. Although the number has decreased by 1,399, the sex distribution is the same as at the 1921 Census.

Of all children for whom particulars were stated 94·4 per cent. had both parents living ; 3·2 per cent. were without father ; 2·2 per cent. without mother ; and 0·2 per cent. were bereft of both parents.

Schooling.—At the 30th June, 1933, there were 97,576 children of the ages six to 14 years inclusive in South Australia. The number receiving instruction at Government Schools totalled 83,490, and at Private Schools 14,522. 17·5 per cent. of the total population of the State were receiving instruction at the 1933 Census, as compared with 18·5 per cent. at the previous Census ; 82·3 per cent. of those receiving instruction were attending a Government School ; 14·3 per cent. were attending a Private School ; and 1·2 per cent. the University ; 2·2 per cent. were stated to be receiving instruction at home.

Since the 1921 Census the number attending Government Schools increased by 12·8 per cent., while those attending Private Schools increased by only 1 per cent. It is of interest to note that about 52 per cent. of those attending Government Schools are males, and 48 per cent. females, and that this proportion is practically reversed for those attending Private Schools.

War Service.—19,975 males and 193 females served abroad with the Australian Forces during the Great War ; 11 per cent. of the adult male population of South Australia being ex-members of the Australian Forces with overseas service.

Religion.—At the 1933 Census the public was advised that there was no legal obligation to answer this question, and 95,611 persons, or 16·5 per cent. gave no reply, as compared with 11,991 persons, or 2·4 per cent. at the 1921 Census, when this option was not published. Of those who stated their religion, the Church of England had the greatest number of adherents with 164,531 (33·9 per cent.) ; followed by Methodist, 127,978 (26·4 per cent.) ; Roman Catholic 63,466 (13·1 per cent.) not including Catholic, undefined 5,979 (1·2 per cent.) ; Lutheran 26,027 (5·4 per cent.) ; and Presbyterian 25,060 (5·2 per cent.). Owing to the large increase in the number of persons who gave no reply to this question, the number of adherents for most denominations at the 30th June, 1933, is shown to be less than the number stated at the previous Census. Eighteen per cent. of the male and 15 per cent. of the female population of South Australia did not state their religion, and for every 100 males who declared they were adherents of the various denominations of the Christian Religion, there were 104 female adherents as compared with 102 females at the 1921 Census.

Birthplace.—The percentage of Australian-born in the population of South Australia showed a substantial increase during the intercensal period, and in 1933 represented 90 per cent. of the population as compared with 88 per cent. in the year 1921. The number shown as born in European countries, 52,123, shows no increase on the number (52,697) stated at the 1921 Census as born in Europe. The number born in the British Isles represented only 7·8 per cent. of the total population, as compared with 9·3 per cent. at the previous Census. The number born in Ireland decreased by 2,000 (35 per cent.) ; those born in Germany by 1,045 ; and from British India by 292. On the other hand, there was an increase of 1,145 in the number born in Italy, an increase of 891 from Scotland, and 587 from Greece.

Period of Residence in Australia.—Of those born outside the Commonwealth for whom length of residence in Australia was specified, 4·9 per cent. had resided in Australia for a period of less than five years as compared with 10·4 per cent. at the previous Census. This is an indication of the extent of the decline in overseas migration into South Australia in recent years. During the intercensal period the immigrant population decreased by 1,153 to 57,016, while the Australian born increased by 86,942 to 523,933.

Foreign Language.—At the 30th June, 1933, 1,942 persons, comprising 1,519 males and 423 females. stated they were unable to read and write English, but were able to read and write a foreign language. Thirty-seven per cent. of this number were able to read and write Italian ; 23 per cent. Greek ; 9 per cent. German ; and 8 per cent Hindu.

Nationality.—The results of the 1933 Census disclosed that 99·4 per cent. of the population of South Australia were of British Nationality, being slightly less than the percentage of 99·5 at the previous Census ; 3,423 persons were of foreign nationality as compared with 2,350 at the 1921 Census, representing an increase of 46 per cent. during the intercensal period as compared with an increase of 17 per cent. in the number of British Subjects , but as previously indicated the relative proportion of British nationals shows little change. Males of non-British allegiance increased by 41 per cent., and females by 72 per cent. The greatest increases were Italian, 857 ; Greek, 442 ; and Yugoslavian, 147 ; whilst those of French Nationality decreased by 140 and Chinese by 128.

Race.—99·5 per cent. of the population of South Australia were of European race at the 30th June, 1933 ; being the same percentage as at the previous Census. During the intercensal period the number of full-blood non-Europeans decreased by 33 per cent. and the number of half-castes increased by 72 per cent., the greatest increase being among the half-caste Australian aboriginals whose numbers increased by 94 per cent. to 1,570.

Industry.—The number of breadwinners, including pensioners, recorded in South Australia at the 1933 Census totalled 275,148, of whom 207,234 were males, and 67,914 females. Pensioners included in this total numbered 22,638, and, excluding pensioners, the breadwinners totalled 252,510, comprising 197,304 males, and 55,206 females.

The proportion of breadwinners, including pensioners, in the male population increased from 67·9 per cent. at the 1921 Census to 71·2 per cent., and female breadwinners from 16·1 per cent. to 23·4 per cent. The increased proportion of breadwinners among females is partly due to the increase in the number of old-age and invalid pensioners since the 1921 Census, as many would, in better times, have been maintained by relatives, and so classed as dependants. Excluding pensioners, and those for whom particulars were not stated, the number of breadwinners who were shown to be associated with some occupation or industry increased by 15·1 per cent.—males by 13·1 per cent., and females by 23·4 per cent.

Both in the year 1921 and 1933 the industrial group (factories) included the largest number of breadwinners, representing 29·9 per cent. at the 1933 Census as compared with 31·3 per cent. at the previous Census. The Agricultural, Pastoral and Dairying group constituted the second largest class and embraced 22·7 per cent. of the breadwinners at the 1933 Census as compared with 23·5 per cent in the year 1921. Next in numerical importance was the Commerce and Finance Group with a percentage of 18·4 at the 1933 Census, which is a substantial increase above the proportion of 15·2 per cent. in the year 1921. The percentage in Personal and Domestic Service remained the same at 9·7, but on the other hand the Transport and Communication group decreased from 9·6 to 8·7 per cent., and those engaged in Public Administration and Professional Occupations from 8·5 to 8·0 per cent. During the intercensal period the largest increase both in actual numbers and in percentage of increase was recorded in the Commerce and Finance group.

Since the 1921 Census the rate of increase in the number of female breadwinners has been higher than that of males in the great majority of groups, the principal exception being the Industrial (factories, construction works, &c.) group in which the percentage of females decreased from 12·7 in the year 1921 to 10·5 in 1933.

The proportion of females to the total number of persons engaged in the various occupational groups has increased as follows during the intercensal period, viz :—Agricultural, Pastoral and Dairying from 2·0 per cent. to 3·0 per cent. ; Transport and Communication from 3·1 to 5·4 per cent. ; Commerce and Finance from 21·4 to 24·9 per cent. ; Public Administration and Professional Occupations from 41·1 to 47·6 per cent. ; Entertainment, Sport and Recreation from 13·6 to 16·0 per cent. ; and Personal and Domestic Service from 80·4 to 82·3 per cent.

Grade of Employment.—The number of persons in South Australia who were of the wage-earning group as at the 30th June, 1933, was 183,851, or 31·6 per cent. of the total population of the State as compared with 30·2 per cent. at the previous Census. Of this number 123,075, or 66·9 per cent., were wage-earners in full-time employment at the date of the Census ; 13,035 persons, or 7·1 per cent. were employed part-time ; 43,740 persons or 23·8 per cent. were unemployed ; and 4,001 persons or 2·2 per cent. were helpers not receiving salary or wages.

Since the 1921 Census the number in the wage-earning group increased by 22·8 per cent. (males by 20·3 per cent. and females by 32·0 per cent.). Although employers increased by 67 per cent. to 22,407, this total was only slightly greater than the number of employers (21,078) recorded at the earlier 1911 Census. On the other hand, those working on own account without employing paid labour decreased by five per cent. to 29,916.

Unemployment.—The number of persons unemployed in the State of South Australia at the 30th June, 1933, totalled 43,740, being 23·8 per cent. of the number of persons in the wage-earning group ; 37,816 males were unemployed and 5,924 females, representing a percentage of unemployment of 26·9 for males and 13·7 for females respectively. It is of interest to note that this result for males is slightly less than the percentage ascertained from the returns supplied by Trade Unions in South Australia to the Commonwealth Statistician for the second and third quarters of the year 1933 ; the proportion of male members of unions unemployed being 30·2 per cent.

The corresponding figures of unemployment for the 1921 Census were—males 7·9 per cent., and females 4·1 per cent.

Of those unemployed at the 1933 Census, 1,260 males and 588 females who were under 21 years of age stated they had never been in employment.

Forty-one thousand six hundred and forty-five of the 43,740 persons unemployed stated the cause of their unemployment ; 92·2 per cent. being due to scarcity of employment and 5·3 per cent. to illness.

The results of the inquiry in respect of duration of unemployment show that 22·4 per cent. had been unemployed for less than 24 weeks ; 33·0 per cent. for less than one year ; 9·8 per cent. for a period of between one and two years ; 15·4 between two and three years ; 21·6 per cent. between three and four years ; and 20·2 per cent. over four years.

Income.—271,264 breadwinners in South Australia gave the required particulars concerning their income. As previously stated, 43,740 unemployed persons and 22,638 pensioners are included amongst the breadwinners ; 13·5 per cent. of the male breadwinners stated that they received no income during the year ended the 30th June, 1933 ; 25·6 per cent. received income less than £1 per week ; 18·0 per cent. between £1 and £2 per week ; 12·2 per cent. between £2 and £3 per week ; 11·4 per cent. between £3 and £4 per week ; 7·4 per cent. between £4 and £5 per week ; and 11·9 per cent. over £5 per week.

The corresponding distribution for female breadwinners was as follows ;—9·4 per cent. no income ; 46·8 per cent. under £1 per week ; 23·9 per cent. between £1 and £2 per week ; 11·0 per cent. between £2 and £3 per week ; 4·5 per cent. between £3 and £4 per week ; 1·7 per cent. between £4 and £5 per week ; and 2·7 per cent. over £5 per week. Including pensioners and unemployed, two-thirds of the male breadwinners (all ages combined) had incomes under £3 per week, and four-fifths of the females had incomes under £2 per week.

In addition to breadwinners, 22,342 persons, comprising dependants and those stating that the questions concerning occupation were not applicable to their circumstances, were in receipt of some income during the year ended 30th June, 1933, and of those, 69·2 per cent. received income less than £1 per week ; 18·0 per cent. between £1 and £2 per week ; and 12·8 per cent. more than £2 per week.

* Classification numbers and diseases as per 1920 International Classification, which was used up to 1930, and as per 1929 classification, which has been used from 1931 on, are shown. In some cases, definite comparisons cannot be made, and even where comparisons are shown there are slight variations.

DIRECT OVERSEA IMPORTS, 1936-37.

(For Alphabetical Index to Items see page 14.)

No. 21.—Direct Oversea Imports into the State of South Australia from 1st July, 1936, to 30th June, 1937.

NOTE.—With the exception of Great Britain, New Zealand, and Australia, and in cases where a single country is concerned, only those countries are shown under each article where the value of imports exceeds £100.

Value of Imports.—The value of goods imported from countries beyond Australia is recorded in British currency and represents the amount on which duty is payable or would be payable if duty were *ad valorem*. Section 154 (1) of the Customs Act, 1901-1930, provides that "where any duty is imposed according to value, the value for duty shall be the sum of the following :—

(*a*) (I.) The actual money price paid or to be paid for the goods by the Australian importer plus any special deduction; or
(II.) the current domestic value of the goods, whichever is the higher;
(*b*) all charges payable or ordinarily payable for placing the goods free on board at the port of export; and
(*c*) ten per cent. of the amounts specified under paragraphs (*a*) and (*b*) of this subsection."

"Current domestic value" is defined as "the amount for which the seller of the goods to the purchaser in Australia is selling or would be prepared to sell for cash, at the date of exportation of these goods, the same quantity of identically similar goods to any and every purchaser in the country of export for consumption in that country."

Quantities.—Generally, but not invariably, quantities have been shown in the ordinary trade unit; where the cental is used, the unit equals 100 pounds avoirdupois. Where imports have been declared in packages without an indication being given of the number, capacity or weight, of the articles imported, the values only have been inserted.

N.E.I. means "Not elsewhere included."

Import Duties.—Duties charged on imports into South Australia are collected by the Commonwealth of Australia under various Acts.

DIRECT OVERSEA EXPORTS, 1936-37.

(For Alphabetical Index to Items, see Page 14.)

No. 23.—RETURN showing the Direct Oversea Exports from the State of South Australia for the Year 1936-37.

NOTE.—The difference between the quantities and the values of Australian produce exported and the total quantities and values exported represents the quantity and the value of produce of oversea origin re-exported.

Value of Exports.—The value of goods exported (including cost of containers) is recorded in Australian currency, and is generally the value in the principal markets of the Commonwealth in the ordinary commercial acceptation of the term, except for the following commodities, concerning which an alteration in the method of valuation of exports was made as follows:—

From 1st July, 1929. *Sugar* (*a*) sold in Australia for export: The value f.o.b., at which the sugar is sold to oversea buyers; (*b*) shipped on consignment: The f.o.b. equivalent of the ruling price of such sugar in the London markets. *Goods on which bounty or rebate is payable on export.* The value of the goods in the principal markets of the Commonwealth less the amount of any bounty or rebate.

From 1st July, 1930. *Wool* (*a*) sold in Australia for export: The actual price paid for the wool plus the cost of all services incurred in placing the wool on board ship; (*b*) shipped on consignment: The f.o.b. equivalent of ruling Australian prices.

From 1st July, 1932. *Wheat* (*a*) sold in Australia for export: The f.o.b. equivalent of the price at which the wheat was sold; (*b*) shipped on consignment: The f.o.b. equivalent of the current selling price overseas.

From 1st April, 1934. *Butter* (*a*) sold in Australia for export: the f.o.b. equivalent of the price at which the butter was sold; (*b*) shipped on consignment: the f.o.b. equivalent of the current ruling price overseas.

From 1st July, 1934. *Flour* (*a*) sold in Australia for export: The f.o.b, equivalent of the price at which the flour was sold; (*b*) shipped on consignment: The f.o.b. equivalent of ruling Australian prices.

Exports of Australian Produce.—Articles which were partly or entirely manufactured from imported materials, raw material produced in Australia and manufactures therefrom, are shown under this heading. No distinction is now made in the records between the produce of this State and that of other States of Australia, the whole being classified as Australian.

N.E.I. means "Not elsewhere included."

Exports to Other States.—Goods transferred from South Australia to the other States of the Commonwealth for shipment to oversea countries are shown as exports from the State from which the goods were finally despatched and are not included in the South Australian details.

Ships' Stores.—Goods shipped as "Ships' Stores" on board oversea ships are not included in exports. For ships' stores see Table No. 19.

* Including scoured wool converted into greasy.

† Excluding £2,592,016 half-share of profits on resale of wool by Imperial Government to which the growers were entitled.

‡ Interstate trade in wool, stocks, and wool used in local factories, are factors which cause differences between figures for oversea export and for actual production.

NOTE.—In compiling the above tables, the mean rainfall in each agricultural county has been first obtained from all available records within or on the borders of the county, and then weighted by the area of the county to obtain the mean rainfall for each Division and the State. Counties Hamley and Young (Murray Mallee), Derby, Lytton, and Taunton (Upper North), and Manchester, Hore-Ruthven, and York (Western) being non-agricultural counties, are excluded in compiling the average rainfall for this return.

(*a*) Gross value is defined as the value placed on recorded production at the wholesale price realised in the principal markets Where primary products are absorbed at a local point or become raw material for a secondary industry, the value in each case is presumed to be the value at the principal market. Values include Bounties.

(*b*) Marketing Costs.—Freight, commission, containers, insurance, &c.

(*c*) Local value is gross value less marketing costs, being value at place of production.

(*d*) Production costs such as stock feed, petrol, oil, seed costs, seed pickling, manures, spraying, dips, and power and water used in irrigation.

(*e*) Production Costs.—Depreciation of machinery and implements (Agricultural, 10 per cent., pastoral and dairying, 5 per cent.) and maintenance of buildings and fences (4 per cent. on estimated present value of buildings, &c., used for farm or station purposes, excluding residences).

(*f*) Net value is local value less production costs.

(*g*) Local value is also accepted as net.

(*h*) Gross value is also accepted as local and net.

(*i*) Not available for previous years.

(*j*) Power, fuel, explosives, timber, &c.
